SOCKS BOARDING

24P2

Automatic boarding machine for sport socks. Direct loading of products on boarding forms by 2 operators allows the processing of a very wide range of casual products and a very high productivity. The machine has a stripping device operating with belts and a programmable stacking system that allows the simultaneous stripping of 2 socks. 24 boarding forms with a quick release system to allow a very easy forms replacement. The machine cycle provides the movement of 2 forms at the time with a longer processing time and a considerable quality improvement of products. Electric presses can be partially activated, according to the socks length, to consistently reduce the power consumption. Touch-screen display for the machine setting with the possibility to store working recipes. Electronic self-diagnosis with errors or malfunctions visual messages. Pneumatic device for a quick forms replacement. Qty. 2 electric presses with partial activation option and temperature electronic control to a maximum of 250°C. Surface of presses, in contact with socks, is covered with high temperature resistant clothes. Belts stripping device with programmable stacking system.
